SUMMARY

Final-year Software Engineering student at Hangzhou Dianzi University with a 4.44 GPA, focused on frontend development, mobile applications, and AI. Seeking an internship or full-time role to apply technical skills and real-world project experience in a professional environment.

PROFESSIONAL EXPERIENCE

Internship, Innovatech Consulting

Tools: HTML, CSS, JS, Angular, SpringBoot

Jul 2025 - Sep 2025

Casablanca, Morocco

- Built and shipped the complete frontend of DigiCard, a web app and admin dashboard, focusing on clean UI and fast load performance
- Redesigned multiple UI components based on user feedback, noticeably improving navigation and overall usability
- Stepped into backend tasks when the team needed support, picked things up quickly and contributed beyond the original scope

PROJECTS

File Conversion Website

Tools: HTML, CSS, JavaScript, PHP, Python

- Development and deployment of a website that converts Excel files into interactive HTML/CSS tables.

NBA Player Statistics Visualization

Tools: Python, Machine Learning

- Development and implementation of a system to explore detailed datasets of basketball players using Anaconda (PyCharm) and a pre-trained Deep Learning model in Python.

Second-hand Sales Application

Tools: React Native, Expo, Firebase, Node.js

- Development of a mobile app allowing users to sell and buy items they no longer need. Features include ad management, user authentication, and an integrated messaging system.

SurFoodSave

Tools: React Native, Expo, Firebase, Node.js

- Development of a mobile app focused on reducing food waste by enabling users to buy and sell near-expiry food items. Features include product listing and management, user authentication, expiration date tracking, and an in-app messaging system for secure communication.

EDUCATION

Bachelor in Software Engineering - HANGZHOU

Sep 2022 - June 2026

- Key Modules: Web Development, C, C++, Java, Advanced Algorithms, Data Structures, Databases, Mobile App Design

DONGHUA UNIVERSITY - SHANGHAI

2019 - 2021

- Chinese language learning for academic and professional communication enhancement.

SKILLS

- Python (Pandas, NumPy, ScikitLearn, PySpark...)
- HTML/CSS/JavaScript
- React Native
- SQL
- Git
- Docker
- APIs & Web Services
- UI/UX Design
- Time Management
- Teamwork
- Problem-solving
- leadership

ADDITIONAL INFORMATION

- Volunteer & Learning Affairs Head, International Student Union (HDU) — Organized cultural exchange events, created visual content, and coordinated cross-cultural projects between local and international students
- Active volunteer at GDG Hangzhou (Google Developer Group) for over a year, participating in every tech event and staying engaged with the local developer community
- Certifications: React Native Course – CodeWithMosh | Python Programming Mastery – CodeWithMosh
